

Sample Handout

This is just a simple example document that shows how documents you upload to Nutri-Q can be easily shared with your clients. If this was an information handout on diet, nutrition, gluten or anything else you like to share with your clients instead of giving them a physical paper copy you could instead upload the file to Nutri-Q and provide them with a URL.

For example, this document is available to anyone who goes to this URL:

<http://docs.wellnesstools.io/nutriq/SampleHandout.pdf>

Your documents are stored under a unique identifier just for you so your URLs are unique as well. Upload anything from PDFs to images. This is a handy feature for quickly getting documents out to your clients.
